think re design value

Our furniture is designed to be forever reconfigured.

Thanks to the high-quality finish and clever design, all components can be exchanged and extended at any time without any problems. This leads to limitless creative freedom, more individuality in design and almost infinite cycles of use.

USM furniture is a valuable companion for life, across generations.

think re design value

USM furniture can be redefined again and again.

This makes USM a valued, consistent companion for life and generations to come. Thanks to the high quality, colours that never fade and a 100% modular system, decades old USM furniture can be seamlessly combined and upgraded with new components.

1 USM Haller Soft Panel

The new USM Haller Soft Panel adds texture and a playful touch to the USM product range. Thanks to magnets, it can be flexibly attached, opened, or repositioned without any assembly effort. Magnetism creates a completely new experience: playful, soft, and easy.

2 Metal magnetic bookend

Available in pure white and graphite black.

3 USM Inos drawer set

Thanks to its dimensions it fits into any piece of USM furniture. The displayed set with 5 closed drawers is available in all 14 USM colours. The drawer sets with 5 open, 10 open or 10 closed drawers are available in graphite black and pure white.

4 Pivoting pen holder

Provides room for writing instruments and can be discreetly stowed under the tabletop.

5 USM Inos internal organisation

Plastic inserts in metal trays are ideal for storing small bits and pieces, whether in the home office or in the house.

6 World of plants for USM Haller

Lively evergreen landscapes can now be easily integrated into the structure of USM Haller.

7 USM Inos box

The USM Inos boxes organise, store and protect both your treasures and everyday bits and pieces. Several boxes can be stacked on top of each other with the help of trays, which can also be used as covers or serving trays, or to hold assorted small items around the home. These soft storage boxes made of non-woven polyester are available in four different sizes and in light grey and anthracite.

8 USM Haller E

A modular structure of your design, either completely or partially equipped with e-Balls and e-Tubes, is connected to a source of electricity. The structure itself conducts the low voltage electricity to the desired location using the e-Balls, e-Connectors and e-Tubes to form a circuit. USB chargers or light sources can be snapped into place in pre-cut recesses.
